

Ou Thornin Vithyea

Phnom Penh, Cambodia | vithyeass@gmail.com | linkedin.com/in/ou-thornin-vithyea | github.com/OuThorninVithyea

PROFILE

Software engineer with 2+ years of experience building full-stack applications. Frontend specialist in Figma-based UI design, Vue.js component development, and responsive layouts. Backend experience in Golang services, REST API design, and database architecture. Comfortable with modern DevOps tooling and AI-assisted development workflows.

EXPERIENCE

OTRES

Phnom Penh, Cambodia

Software Engineer

2026 – Present

- Built admin API with Go 1.26 and Fiber implementing Clean Architecture (handler → service → repository layers) across 38 files and ~2,700 lines, with full CRUD user management, role-based authorization, soft-delete, and audit trails.
- Implemented JWT HS256 authentication with Redis-backed session management for stateless request validation, plus real-time WebSocket communication with connection tracking and broadcast.
- Designed PostgreSQL schema with sqlx for type-safe queries, unique indexes, connection pooling, and Redis read-through caching for user data with configurable TTL.
- Integrated go-i18n for EN/KH/ZH multi-language support across 28 keys, structured zerolog logging, and standardized JSON response format (success, error, paginated).
- Containerized with Docker Compose (Go + PostgreSQL 18 + Redis 7) and multi-stage Dockerfile (Go build → Alpine runtime) for reproducible deployments.

PROJECTS

BongThom Cloning

Go / Fiber / Vue.js / PostgreSQL / Redis

Full-stack admin management platform: Vue.js SPA frontend, Go/Fiber REST API with Clean Architecture, JWT auth, WebSocket, i18n (EN/KH/ZH), PostgreSQL+sqlx, Redis caching, and Docker Compose. Built during OTRES internship, 2026.

NomadList Cloning

Go / Vue.js / JavaScript

Destination discovery platform: full-stack listing and browsing app with Go backend, Vue.js frontend, and multiple JavaScript/CSS iterations. Built during OTRES internship, 2026.

RemoteWork.js Cloning

JavaScript / HTML / CSS

Remote job board: vanilla JavaScript SPA with responsive design, multi-page navigation, and structured job data — no frameworks. 2026.

EDUCATION

B.Sc. Software Engineering

2023 – Present (Expected 2027) | Limkokwing University of Creative Technology, Cambodia | GPA: 3.5

Relevant coursework: Software Engineering, Web Development, Human-Computer Interaction, Data Structures & Algorithms

IELTS Overall Band Score 6.0

2026

SKILLS

Languages: Go, JavaScript, TypeScript, HTML/CSS, SQL

Backend: Fiber, REST APIs, Clean Architecture, JWT, WebSocket, gRPC, Redis, PostgreSQL, MySQL, sqlx

Frontend: Vue.js, React, Next.js, Tailwind CSS

DevOps: Docker, Docker Compose, Git, CI/CD

Tools: zerolog, go-i18n, Figma, VS Code

LANGUAGES

Khmer — Native | English — Professional working proficiency
