Phnom Penh, Cambodia | vithyeass@gmail.com | linkedin.com/in/ou-thornin-vithyea
github.com/OuThorninvithyea | Portfolio: cv-ou-thorninvithyea-fvkg.vercel.app

PROFILE

Software Engineering student (graduating 2027) and backend-focused full-stack developer. Builds Go services with layered architecture, PostgreSQL, Redis, and Docker, with Vue.js frontends and Flutter mobile clients. Interested in system design and scalable backend architecture.

EXPERIENCE

OTRES

Phnom Penh, Cambodia

Software Engineer

2026 – Present

- Built an admin API in Go/Fiber with a layered architecture (handler → service → repository): user management, RBAC, soft-delete, and audit trails.
- Implemented JWT auth with a Redis session store for instant revocation, plus Redis caching and rate limiting; real-time notifications via WebSocket and Server-Sent Events.
- Built Flutter/Dart mobile screens and Nuxt.js (Vue 3) web interfaces; integrated a local payment gateway into an e-learning checkout flow and built image/video upload processing.
- Containerized services with Docker Compose and multi-stage Dockerfiles; set up CI/CD pipelines with multi-platform image builds.

PROJECTS

Nomad City Guide

Vue 3 / Go / Fiber

City discovery platform for remote workers with a Go REST API and Vue 3 SPA.

Remote Job Board

Vue 3 / Go / Fiber

Job listing and posting platform with a Go REST API and Vue 3 SPA.

EDUCATION

B.Sc. Software Engineering

2023 – Present (Expected 2027) | Limkokwing University of Creative Technology, Cambodia | GPA: 3.5

Relevant coursework: Software Engineering, Web Development, Human-Computer Interaction, Data Structures & Algorithms

SKILLS

Languages: Go, JavaScript, TypeScript, Dart, SQL, HTML/CSS

Backend: Fiber, REST APIs, PostgreSQL, Redis, JWT, WebSocket, Server-Sent Events, sqlx

Frontend & Mobile: Vue 3, Nuxt.js, Tailwind CSS, Flutter

DevOps & Tools: Docker, Docker Compose, CI/CD, Git, Figma

LANGUAGES

Khmer — Native | English — Professional working proficiency
